

# Complimentary Colors

Complimentary Colors are colors opposite each other on the Color Wheel. See color wheel below:

Yellow's compliment is Violet  
Red's compliment is Green  
Blue's compliment is Orange

Mixing any two complimentary colors creates a Grey. It will neutralize the colors. You can make a color lean toward the warm side or cool side, depending on the amount, of either color used.

Warm colors and yellow, orange, and red.  
Cool colors and green, blue and violet.
